Java IDE Installation

step 1. Explored Many IDE's like Eclipse
Intellij , and Many.

But the Installation step I followed

1. Intalled JDK for Windows

2. Seted up the Environment.

3. Installed VS code

4. Installed some Extention
        - Debugger for Java
        - Code runner

5. written the Java code and successfully
got the output.

Program :

```
Public class First {
    Public static void main (string [] args){
        System.out.println ("Namasthe");
    }
}
```
